

Asma AL-garably

Python Developer | AI & ML Engineer

PROFESSIONAL SUMMARY

I am a Computer Science graduate specializing in Artificial Intelligence and Machine Learning. I have strong academic knowledge and practical experience in developing AI-based solutions, and I aim to contribute to innovative projects that leverage AI technologies for real-world applications.

EDUCATION

Bachelor of computer science | 2021-2026

Al-Aqsa University, Gaza

- Relevant Coursework: Machine Learning, Data Structures & Algorithms, Artificial Intelligence, Natural Language Processing, Database Systems, Software Engineering, Cloud Computing
- GPA: 94.0/100

PROJECTS

• **Telegram Academic Chatbot | Capstone Project**

- Developed a Telegram bot using Python and NLP to answer student queries.
- Applied text preprocessing, Transformer embeddings, and SVM classification to categorize questions.
- Integrated a knowledge base for real-time responses.

• **Building Damage Assessment (In Progress)**

- Developing a Computer Vision tool to detect and analyze structural damage in Gaza.
- Utilizing image processing libraries to identify affected areas and assess damage severity.

• **Diabetes Prediction System (AI Project)**

- Built an intelligent system using Machine Learning to predict the likelihood of diabetes.
- Implemented models such as Logistic Regression and Random Forest using Python and Scikit-learn.
- Deployed the model using Streamlit for an interactive user interface.

Technical Skills

- Languages: Python (Advanced), SQL, JavaScript.
- Web: Django, Flask, REST APIs.
- AI/ML: NLP, Gemini API.
- Data: Pandas, NumPy, Data Mining, Pillow.
- Tools: Git/GitHub .

Soft Skills

- Problem-Solving: Analytical thinking for complex technical challenges.
- Adaptability: Proven ability to work and deliver under dynamic conditions.
- Quick Learning: Fast acquisition of new AI frameworks and tools.
- Collaboration: Strong communication skills within technical teams.

Certifications

- Complete Data Science & Machine Learning Course | Udemy (2025)
- Covered Python programming, data preprocessing, machine learning algorithms, NLP, and AI model building.
- Introduction to Python | DataCamp (2025)
- 4-hour hands-on course focused on Python fundamentals, syntax, and data handling.
- Certificate ID: #36,811,210, signed by Jonathan Cornelissen, CEO of DataCamp.
- Comprehensive course on Artificial Intelligence fundamentals and real-world applications.
- SkillStack Paths (Fundamentals and DSA) | Gaza Sky Geeks (2024)
- Focused on programming fundamentals and Data Structures & Algorithms (DSA).
